## TERRITORIAL TOPICS.

Beaver County's Great Need of a Railroad.

EXPORTING HER DRIED FRUIT.

The Christy Fire—The Courthouse to be Rebuilt—Notes from Kamas.

BEAVER, Utah, November 5.—[Correspondence of THE HERALD]—Notwithstanding the drought and pinch bugs with which the farmers of this southern section of the Territory have had to contend with, to a greater or less extent during the past season, the crop of cereals, especially wheat and oats, appears to be somewhat in excess of previous years. Whether this apparent increase is, however, to be attributed to greater productivity or to an increased acreage is a debatable question. Potatoes and other root crops are also large, and as a consequence very low in price. The great need of rail transportation to Arizona and Southern California for our marketable potatoes and grain is more apparent now than ever, and it is certainly to be hoped that some of the railroads said to be heading for Utah en route to the coast can be induced to continue on through this section of country and thereby give us a chance to find a market for the produce of southern Utah. The amount of dried fruit, especially "peeled peaches," that is being shipped this fall from the southern counties to Salt Lake is

BEYOND ALL PRECEDENT.

at least as far as quantity is concerned, in the history of this section of the Territory. As many as fourteen heavily-laden two-horse teams having arrived in Millard in one day, there to tranship their loads of fruit by rail to Salt Lake, and owing to the scarcity of sacks have been compelled to load the fruit into box cars in bulk, and these shipments have been going on for over a month past.

The silver and lead mining outlook of the south is unchanged and I regret to say is not of the best, the recent fall in the price of lead having caused a practical cessation in the output of several lead mining properties. The French company now operating in Copper Gulch, some four or five miles west of Frisco, are erecting an improved copper smelting plant which the company has recently brought on from the east. More, albeit is the practical superintendent of the concern. In view of the erection of this new smelter other copper mines in Copper Gulch, in what is known as a Rocky district, the ore of some of which contains over 80 per cent. pure copper, are being worked. Silver Reef is about as usual, not very brisk. The Christy Mining Company met with a serious loss there one day last week, in the total destruction by fire of the steam-hoisting works on top of their California mine. In addition to the hoisting works, the timber casing of the main shaft of the mine was consumed by fire down to the 250-foot level, thereby causing a serious caving in of the sides of the shaft.

Report has it that several of the towns in the western end of Sevier County, have been seriously afflicted with that dread complaint, diphtheria. The little town known as Joseph City has been about the worst sufferer, and as a consequence, has been

ALMOST WHOLLY QUARANTINED

from the outside world. The disease has now, however, abated.

Beaver has also had an affliction, but of minor degree, the trouble in this case being typhoid fever. The mortality has thus far, however, been rather light compared with the number reported as suffering from the disease. Several have entirely recovered but George A. Olcott succumbed to the disease last Tuesday, and his body was interred the following day. Mr. Olcott was a man of about 34 years of age and leaves a wife and five children in quite destitute circumstances. He was a barber, the only one of that profession in the town, and was highly respected. Saturday the second victim passed to her final rest, in the person of Mrs. Matilda Bakes Blackner, the beloved wife of Leonard Blackner. Mrs. Blackner was a handsome young lady of less than 25 years of age, and leaves two children besides a host of relatives and friends to mourn her loss. Several other persons are also sick with typhoid fever, and in two or three cases are reported as being at death's door. Beaver has always been proud of its comparative healthfulness, but Sexton Ash reports a mortality this year of twenty-six persons, fourteen of whom were adults, and that, too, out of a population of less than 2,000 souls. Yesterday we were favored with the first snowstorm of the season, and it is to be hoped that it will have cleared the atmosphere and brought about a more healthy condition of affairs.

The walls of the county court house still stand gaunt and blackened from the effects of the recent conflagration. Ketting, of Salt Lake, is said to have been selected as the architect for the new construction and it is rumored that we are going to have a finer building than ever. "The sooner the better."

Notes From Kamas.

FINE weather again. The first ball of the season comes off to-night, and a joyful time is anticipated.

EVERYBODY is anxious to cast his vote for his favorite delegate at the coming election.

MR. AND MRS. LEGRANDE YOUNG are in from Ashley on a visit to relatives and friends.

WOMAN comes from Lambert's Mill that the snow is five inches deep and too cold for it to grow less.

THE most important man about Kamas now-a-days is Luke Carpenter. It is a boy and all are doing well, the new "pa" not excepted.

A NUMBER of our citizens went to Peoria to-day to attend the picnic given in honor of Dart Maxwell, who is about to leave home to labor as a missionary.

ROAD SUPERVISOR PETERSON is making times lively for delinquent poll tax payers. Several have had to pay costs of court, and have decided that it is better and cheaper to comply with the demands of the law at once.
